

Penetration Testing Report

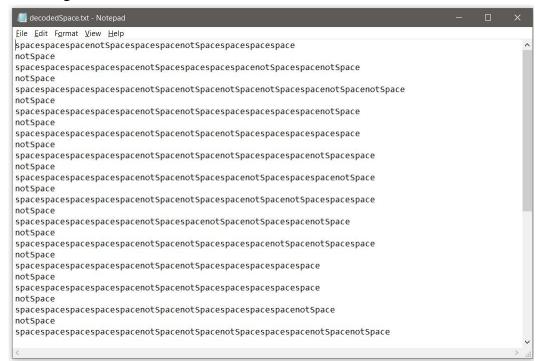

For

"Spaces"

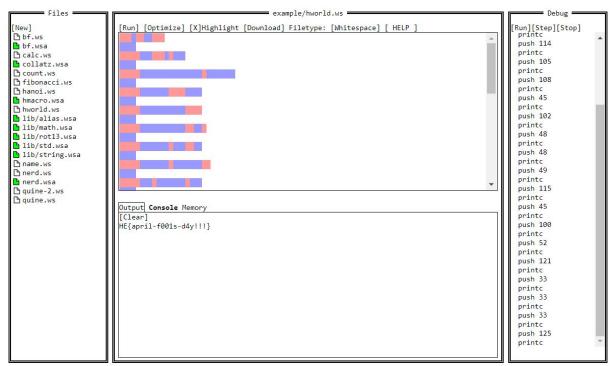

S.NO.	Title	#
1.	Challenge Category Cryptography	
2.	Challenge Related Files	spaces.txt
3.	File Link / Target IP	N/A

PROCEDURE

1. Decoding the contents of the file from Base64.

2. Replacing the 'space' with a SPACE() & 'notSpace' with a TAB(), we get a source code of an esoteric programming language termed Whitespace. Compiling it give us the flag.

Flags:

S.No.	Flag - No.	Flag
1.	Flag 1	HE{april-f001s-d4y!!!}
